

Software Developer

Systems Analysis | Database Design | Technical Documentation

Software Engineering Technology co-op student at Centennial College with hands-on experience in systems analysis, low-code prototyping, database design, and Linux/Windows environments. Experienced in translating business requirements into practical software solutions and producing clear technical documentation. Seeking to leverage my technical foundation and analytical skills to contribute to innovative software development projects.

SUMMARY OF QUALIFICATIONS

- Experience gathering business requirements, mapping out user workflows, and building working prototypes to test concepts before moving into development.
- Knowledge of full System Development Life Cycle (SDLC) processes, including creating system diagrams, data flow models, and use cases using Visual Paradigm and Microsoft Visio.
- Practical experience designing relational schemas in Oracle SQL Developer, writing queries with multi-table joins, subqueries, and aggregate functions, and ensuring data integrity.
- Experience configuring Linux virtual machines, managing network firewall rules using ufw, and working across both UNIX/Linux and Windows operating systems.
- Proficient with Microsoft Office applications (Word, Excel, PowerPoint, Visio, SharePoint) to create user guides, test plans, and technical documentation.

EDUCATION

Software Engineering Technology Co-op Advanced Diploma

Centennial College – Toronto, ON

September 2025 – Present | Expected Graduation: December 2028 | GPA: 4.414

Relevant Coursework: Software Systems Design, Web Application Development, Programming (C#, Python, Java), Advanced Database Concepts, Unix/Linux Operating Systems.

CERTIFICATIONS

- **Google Data Analytics Professional Certificate** – Coursera | 2026
- **Data Analysis with Python Certification** – freeCodeCamp | 2026

PROJECTS

FPL AI Optimizer | *Lead Developer* | Toronto, ON | June 2026

Python, Streamlit, PuLP, Pandas

- Built an interactive web dashboard in Streamlit Cloud to automate calculations and present data outputs to users.
- Implemented user input validation and error handling to keep the application stable across mobile and desktop devices.
- Documented system logic and workflow steps to make future updates and testing straightforward

Watch & Smartwatch Inventory Database | *Database Architect* | Toronto, ON | April 2026

SQL, Relational Database Design, Oracle SQL Developer

- Analyzed business domain requirements to design a multi-table relational database schema for tracking inventory and orders.
- Wrote SQL scripts incorporating subqueries, joins, and constraints to maintain data integrity and run accurate reports.
- Documented ER diagrams and data flow architectures in Microsoft Visio to align the database structure with system design standard.

Interactive Restaurant Web Application | *Frontend Developer* | Toronto, ON | March 2026

JavaScript (ES6), HTML5, CSS3, REST APIs, Leaflet.js

- Created responsive wireframes and modular layouts using CSS Grid and Flexbox for clean rendering across screen sizes.
- Integrated RESTful APIs (OpenWeatherMap, Leaflet.js) and tested form validation under simulated network latency.
- Refined user interface components based on testing feedback to improve workflow efficiency and navigation.
